PRODUCT DESCRIPTION

VIRIBRIGHT LED PL Retrofit Lamps are designed to replace plug in (PL) Compact fluorescent lamps (CFLs). VIRIBRIGHT LED PL lamps are ballast compatible with magnetic ballast or direct wire applications and engineered for horizontal applications.

VIRIBRIGHT LED PL lamps replace 13- and 18-watt inefficient PL CFLs, and retrofit a variety of commercial fixtures to include recessed cans, sconces, and ceiling fixtures most commonly found to light retail stores, hotels and apartment buildings.

Constructed with a lamp holder that rotates to adjust to a variety of base angles found in the market and is engineered for years of maintenance free horizontal stick applications.
